Weekly Updates Data Team (Ryan)

Manager	Role		Current Focus	Blockers/Issues	Success
Ryan	Data Engineer		• Matheus is prioritizing the completion of PLQA flags, which need to be landed as soon as possible. • Matheus is addressing a pipeline issue that is causing a test to fail, with plans to check it after completing the PLQA flags. • Matheus is collaborating with Gabriel on the Lily project, which is now in phase two, and plans to work on the query for the project after resolving the current issues. • Matheus is managing multiple tasks simultaneously, including the PLQA flags, pipeline issue, and Lily project, and plans to prioritize them accordingly.		
Ryan	Data Engineer		• Nilo reported inconsistencies between Google Sheets and Snowflake, which were identified and sent to the responsible team for resolution. • Nilo is working on a two-phase project with two engineers, focusing on moving calculations to a more efficient mechanism due to performance issues with the default method.. • Nilo created an EDM flag and planned to send it for review on the same day.		
Ryan	Data Engineer		• Working on finishing the queuing setup for his project • Export tree and clean delivery tables as part of his project tasks. He is also updating flags based on feedback received.		
Ryan	Data Engineer		• Leonardo completed on-call tasks from the previous week and is now starting a new project.	• Leonardo is struggling with the installation and usage of the Maestro tool, which is not working as expected.	

Weekly Updates Data Team (Ryan)

Manager	Role	Team Member	Current Focus	Blockers/Issues	Success
Ryan	Data Engineer		• Bruno is covering for Allan in another project, with assistance from Morgan, and they are currently on the second delivery phase. • Bruno is working on an investigation ticket assigned by Ryan to evaluate the impact of deprecating some flags. • Bruno is also working on a Maestro ticket assigned by Lorena, facing challenges with setting up and understanding the tool.		
Ryan	Data Engineer		• Gabriel is working on a project that was affected by a therapy incident, ensuring that the rules were correctly applied. • Gabriel received a new project from Lorena and is awaiting details on what it will involve. • Gabriel is handling technical tickets, including indexing data for the EDM project. • Gabriel anticipates an increased workload next week with the start of two new projects but is prepared to manage it.		
Ryan	Data		• Roman is now focusing on working on index data points, which was part of their planned tasks before the disruption. • Roman plans to figure out further work related to the project, including determining if certain tasks are related to queuing or deliverable table side.	• Roman experienced a stressful situation due to poor management and an urgent request that disrupted their planned work. The request was not aligned with the project timeline and caused unnecessary stress.	
Ryan	Data Engineer		• Leonardo Souza is focused on delivering a project by Monday, which includes updating the rule set used in the project. • Leonardo plans to finish some additional tasks by next week.
